An Introduction to Services for Students with Disabilities (SSD)

SSD's primary role is to ensure students with disabilities have equal access to their academic experience at The University of Texas at Austin. SSD also consults with other campus offices and departments to facilitate access and inclusion in all aspects of campus life.

SSD works with students with a broad range of disabilities including:

- AD/HD
- Autism Spectrum Disorders
- Deaf/Hard of Hearing
- Learning Disabilities
- Medical Conditions (diabetes, migraines, epilepsy, etc.)
- Mobility Disabilities
- Psychological/ Mental Health Conditions
- Temporary (broken bones, concussion, etc)
- Traumatic Brain Injury (TBI)
- Visual Disabilities

Students who have questions about whether their condition qualifies as a disability are encouraged to contact SSD. Details of a student’s disability are kept confidential within the SSD office.

SSD determines eligibility and approves academic accommodations that may include:

- Extended time on exams
- Reduced distraction testing environment
- Copy of notes and/or slides
- Permission to arrive late/leave early
- Permission to step out of class
- Flexible attendance
- Flexible deadlines
- Preferential seating

Accommodations cannot change the essential requirements of a course, program or degree. SSD staff are available to consult with instructors regarding any questions or concerns about accommodations.

Students should notify instructors of their need for accommodations via an Accommodation Letter, provided by SSD. Students and instructors should meet to discuss the approved accommodations and coordinate how they will be provided within the context of each course.

SSD also offers the following supports and services to students:

- Course load reduction (non-academic drop, no ‘Q’ penalty) and maintain full-time status
- Computer lab with assistive technology (Kurzweil, ZoomText, Dragon)
- Walk-in hours for consultation/problem-solving (Monday – Friday, 9 a.m. – 4 p.m.)
- Referrals and potential funding for disability evaluation/testing

The University of Texas at Austin is required to provide equal access by three federal laws:

- The Rehabilitation Act of 1973,
- The Americans with Disabilities Act of 1990
- The Americans with Disabilities Amendments Act of 2008

Faculty and staff play a vital role in ensuring compliance by accommodating students with disabilities. SSD is available to consult with faculty or staff about how to accommodate or work with a student with a disability.

Additional resources are available on the faculty/staff section of the SSD website:

## Tips For Instructors Providing Accommodations

<table>
<thead>
<tr>
<th>Students and Instructors must discuss the accommodations listed in the Accommodation Letter from SSD before accommodations can be provided. Ideally this conversation will be started by the student but instructors are encouraged to provide a safe and supportive space for discussion. Students should not expect to receive accommodations on the same day the letter is delivered.</th>
<th>Accommodations are provided in order to ensure students have equal access to their academic endeavors. Accommodations cannot change the essential requirements of a course, program or degree. Instructors who have questions or concerns about an approved accommodation should contact SSD for consultation.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students with disabilities have met the same admissions standards as any other students. Treat students with disabilities with the same courtesy you would afford to other students and hold them to the same academic standards and expectations as any other student.</td>
<td>Failure to provide approved accommodations may put UT at risk for non-compliance with federal and state laws. Instructors with questions or concerns should contact SSD immediately before telling the student accommodations cannot be provided.</td>
</tr>
<tr>
<td>The presence and legitimacy of a student’s disability has been verified by the SSD office. Students do not have to disclose their diagnosis or their disability to anyone outside the SSD office and should not provide disability documentation directly to an instructor. Treat disability information which has been disclosed to you as confidential.</td>
<td>Students have a right to use accommodations but they also have responsibilities they must abide by in order to use their accommodations. Student Rights and Responsibilities can be found on the SSD website: <a href="http://diversity.utexas.edu/disability/rights-and-responsibilities/">http://diversity.utexas.edu/disability/rights-and-responsibilities/</a> Students who fail to follow through on their responsibilities may be delayed in receiving their accommodations.</td>
</tr>
<tr>
<td>More than 90% of students using accommodations have “invisible disabilities” which means you cannot see their disability. Examples of invisible disabilities include ADHD, Autism, Learning Disabilities, Mental Health Conditions, Medical Conditions, Visual Disabilities or Hearing Disabilities. Do not question or doubt the presence of a disability just because it is not apparent.</td>
<td>Encourage students to follow university’s policies, such as registering with SSD to receive approval for accommodations. This protects students, faculty and the institution by ensuring consistency. Violations have been found in cases where faculty members have not followed institutional policies or have failed to properly refer students to the appropriate offices.</td>
</tr>
<tr>
<td>Instructors should enlist the support of their departments to secure resources for accommodating students (such as space for providing testing accommodations). Ensuring accessibility is the responsibility of individual instructors as well as departments and colleges/schools.</td>
<td>Each member of the UT community plays a role in creating an accessible and inclusive environment at UT. It is essential for faculty and staff and departments to consider accessibility as they develop, plan and implement programs, classes, activities, etc.</td>
