Goal 1 Discussion:

- What about existing institutional members that are already receiving this information and expertise? Do we need another objective for them for the next phase? Possibly making existing members/leader institutions to become mentor institutions? Thought partners?
- Under membership, add non-profit and community partners
- Maybe add an objective on building a business plan that is sustainability

Goal 2 Discussion:

- We need to develop strategies under Objective 2.1—how we are going to create benchmarks and measure this.
- Re-think overarching category name of “Resource Development”

Goal 3 Discussion:

- Re-thinking the word “Dissemination”—it’s more of a strategy. Re-look and how we word Goal 3. Maybe go back to “becoming a national leader in research on MOC”? 

What’s missing from the goals?
